HOSPITALITY

THE UNIT

A SELF-CONTAINED PADDOCK HEADQUARTERS

Built on a purpose-designed trailer chassis, the HOSPY 200 arrives, levels itself on six hydraulic legs and opens out. Dual slide-outs expand the lower floor into a full dining and servery space; two wing extensions on the upper deck create a covered VIP viewing terrace. Everything is operated from a single wireless remote.

DEPLOYMENT

Fully deployed in under four hours — with one trained operator.

LESS MANPOWER • FAST SETUP & TEARDOWN
IDEAL FOR BACK-TO-BACK RACE WEEKENDS

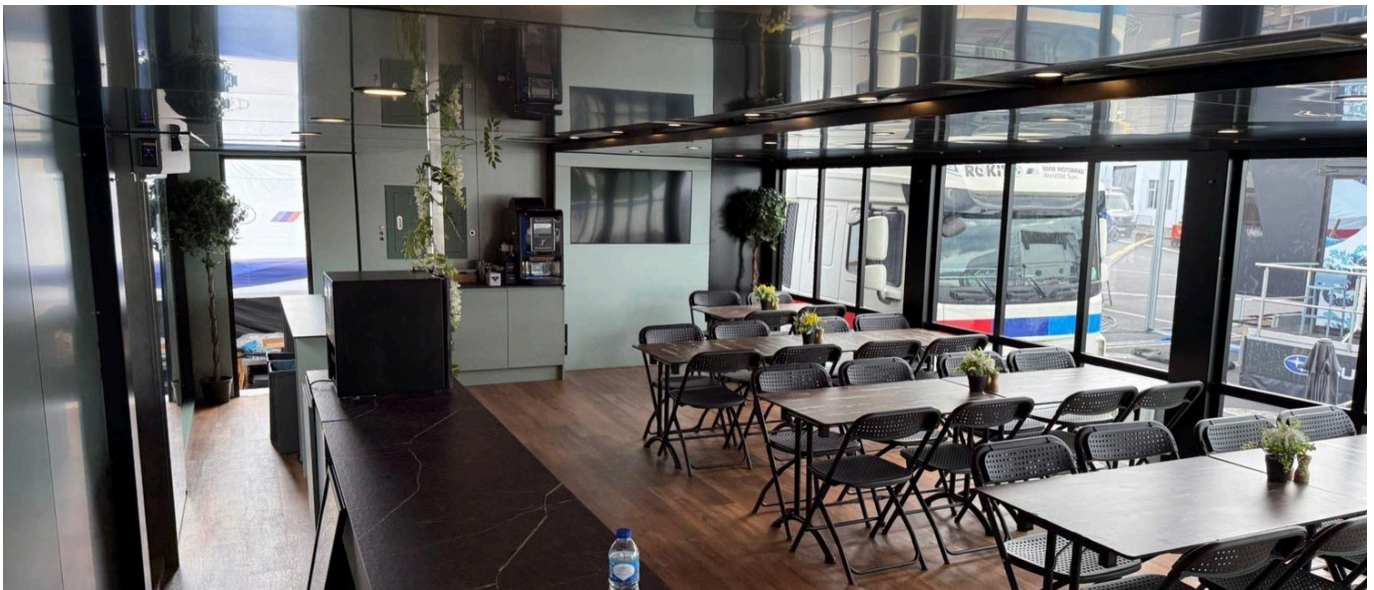

• LOWER OPERATIONAL COMPLEXITY •

LOWER LEVEL • 557.59 FT²

DINING, SERVERY AND TEAM SPACE

With both slide-outs deployed, the ground floor becomes a long, glazed dining room — commercial-grade vinyl or optional wood flooring, premium composite wall and ceiling panels, and full-height windows down both sides.

A built-in server counter runs along the inboard wall with refrigeration, coffee and cold-drink display. An automatic front entrance door with integrated staircase and handrails handles guest flow; a second manual door in the rear slide-out keeps crew traffic separate.

UPPER VIP LEVEL • 628.29 FT²

THE LOUNGE ABOVE THE PIT LANE

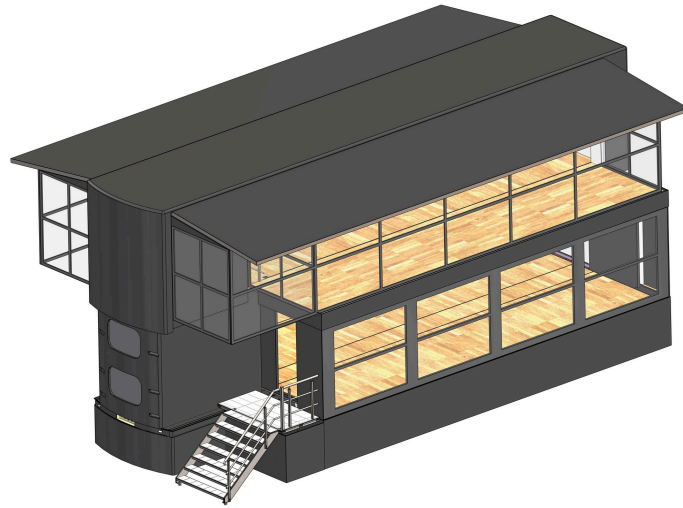

An internal staircase leads to the upper floor: a lounge and seated dining area wrapped in glass, with soft seating, feature lighting and screens on every wall. Two side wing extensions open outward to create a sheltered open-air viewing terrace.

Audio and video run independently from the lower level, so a sponsor reception upstairs and a team debrief downstairs never collide. Timber wall detailing and warm lighting keep it closer to a private members' club than a race trailer.

HOSPY 200

MANUFACTURING SPECIFICATIONS

CHASSIS & STRUCTURE

- New custom-designed trailer chassis with **ABS braking** and **air suspension**
- Main structure in **galvanized tubular steel profiles**; all welds treated for corrosion protection
- Lower storage compartments in welded and treated tubular steel framework
- Compartments with lockable handles, concealed hinges, perimeter water-diverting seals and rubber weather seals

HYDRAULIC SYSTEM

- **Six hydraulic leveling legs** for stabilizing and leveling
- Hydraulic cylinders operate the side slide-outs and raise the hospitality structure
- Each slide-out on a reinforced adjustable-height support system
- All cylinders fitted with integrated safety valves
- Two electric motors, each with its own pump — **two independent hydraulic systems**
- Multifunction **wireless remote control**; latest-generation solenoid valves
- Hydraulic fluid reservoir; premium fittings and hoses throughout

EXTERIOR CONSTRUCTION

- Continuous polyester cladding panels, color to be determined
- Perimeter finished with aluminum angle trim
- Rubber and brush seals maximize weatherproofing around all side openings
- **Wall Mate insulation panels** between steel structure and exterior cladding
- Standard exterior colors: **white and grey**

INTERIOR CONSTRUCTION

- Ceilings and walls in premium composite panels, standard color collection
- High-strength Finnish plywood subfloor with commercial-grade vinyl flooring
- **Dual hydraulic slide-outs** on the lower level, one per side

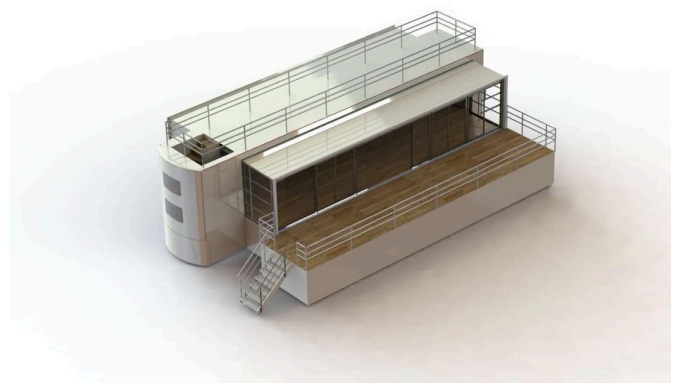

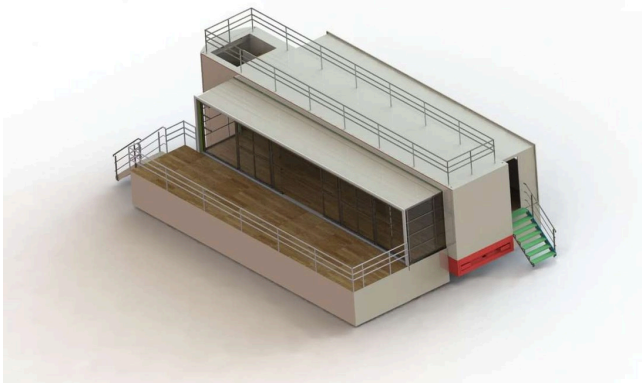

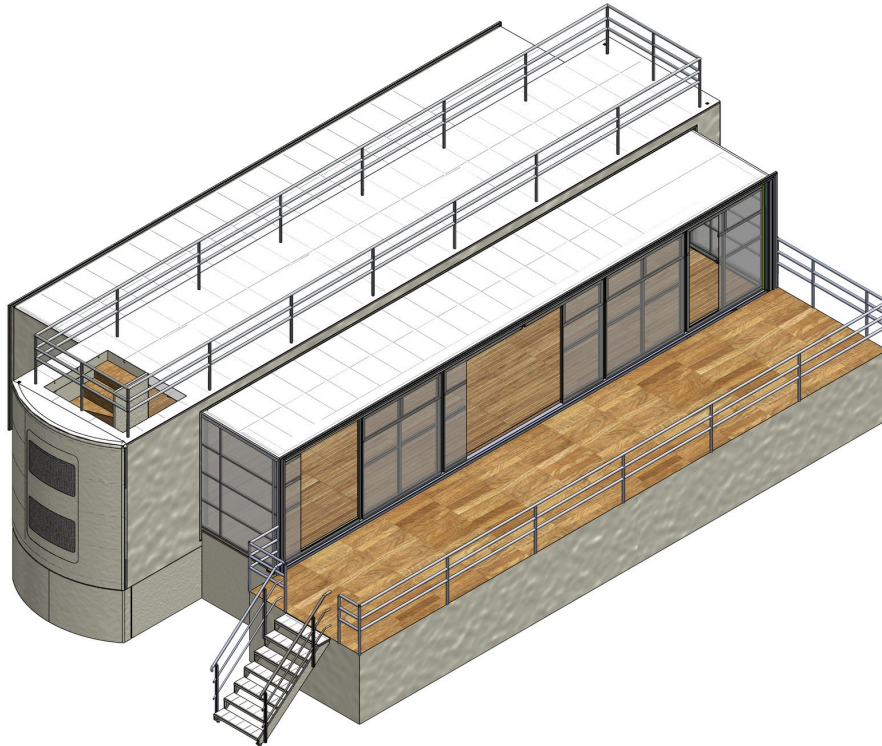

ACCESS & LAYOUT

- **Main entrance:** automatic access door with integrated staircase and safety handrails
- **Rear entrance:** manual door built into the rear slide-out, with staircase
- **Upper VIP level:** two side wing extensions form the outdoor viewing area; internal staircase access

HOSPY 100

A single-level unit on the same engineering as the 200. The hospitality floor opens onto a full-length side terrace, with a second terrace on the roof reached by an internal staircase.

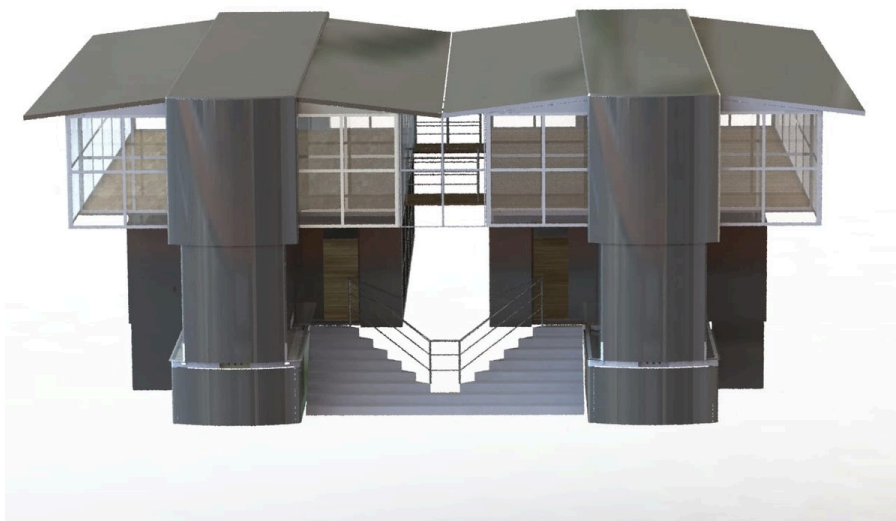

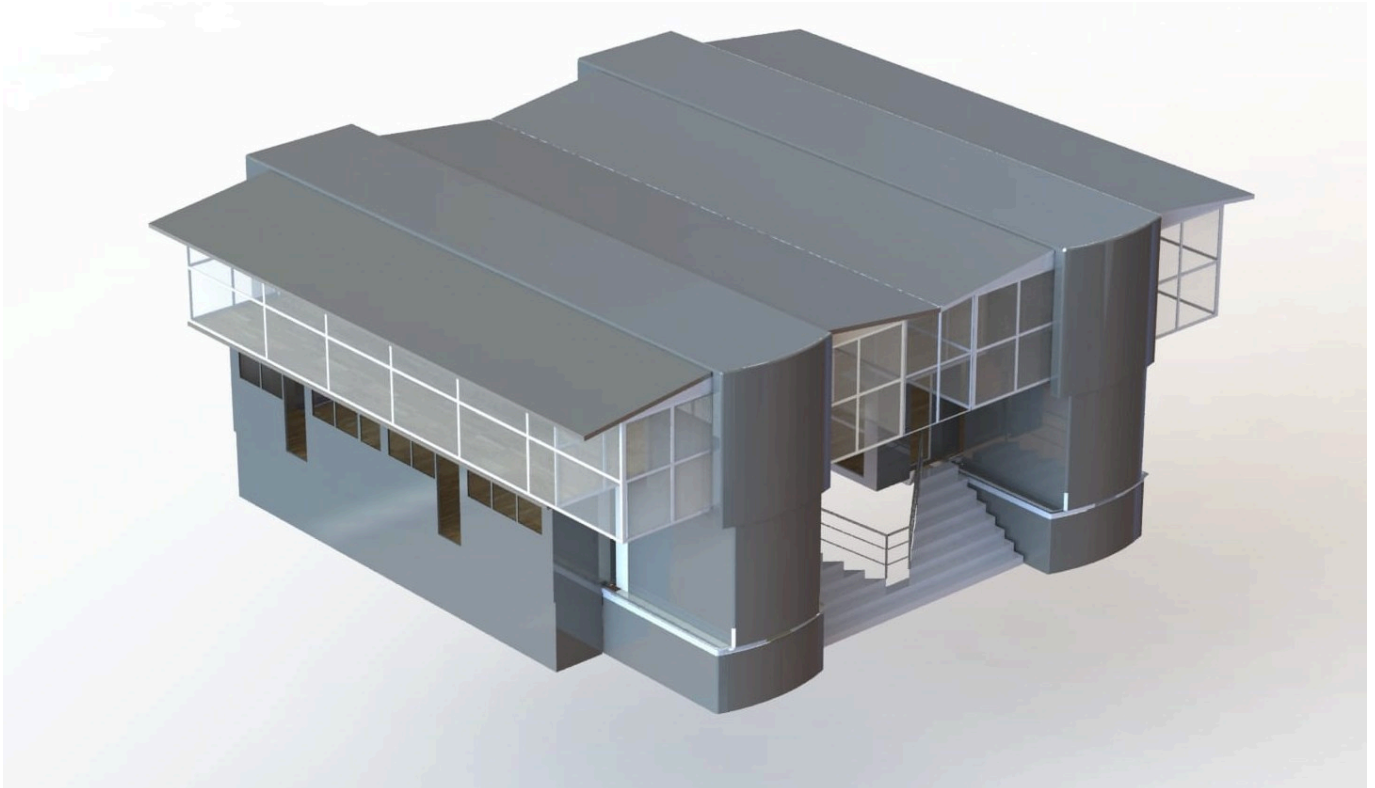

Designed around standard road transport, so it moves between events without oversize handling. Specification, footprint and pricing are being finalised.

HOSPY 400

Two HOSPY 200 bodies joined down the centre, opening into a single venue at roughly twice the floor area — the largest unit in the range.

A twin staircase rises through the middle to a shared upper level, with covered terraces running the full length of both outer sides. Specification and pricing are being finalised.

OPTIONS & UPGRADES

SPECIFY IT YOUR WAY

AUDIO & VISUAL PACKAGE

- 7 x **Samsung The Frame 55"** Vision AI smart TVs (2025) with integrated wall mounts
- 4 screens on the main hospitality level, 3 in the upper VIP lounge
- **Sonos & Sonance** in-ceiling speaker system, 4-6 speakers per floor
- Independent audio per floor via dedicated Sonos Amp units

INTERIOR & FINISH

- Premium **wood flooring** upgrade
- Standard exterior colors: white, grey
- Green, red and yellow also available at **no additional cost**
- Any custom or corporate-specific color available on request
